Your Guide to Dental Implants

Dental implants can:

- Replace a single tooth, without requiring support from neighbouring teeth.
- Replace multiple missing teeth, restoring your smile and bite.
- Provide support for a denture, making it more secure and comfortable.
- Replace a denture, with teeth that are fixed in place.

Dental implants are most like natural teeth . . .

Benefits of dental implant treatment:

- They improve your appearance by looking and feeling like your own teeth.
- They are very secure and allow you to eat, speak and smile with confidence.
- Treatment is highly successful and results are predictable.

Restore Confidence in your smile!

Have you been told you are not a suitable candidate for dental implants?

If you've answered yes, then you may be a candidate for ***Zygoma (or Zygomatic) implants***. These implants are used in the upper jaw when there is insufficient bone for ordinary implants. They provide support for implant bridgework where there has been a substantial amount of bone loss from the upper jaw, and ordinary implants cannot be used on their own to support a bridge. This is a very specialist procedure and here at DentalHouse, our own ***Dr Wilson Grigolli*** is one of the few clinicians in Ireland with the expertise to use this procedure.

Why Choose Us?

With over 30 years clinical experience and having placed over 27,000 dental implants, you can rest assured you are in good hands with our lead implantologist Dr Wilson Grigolli. Having worked alongside Prof Dr Per-Ingvar Brånemark, the "father of modern dental implantology", he brings a wealth of knowledge and passion to his work.

Since 2006, he has been serving as Professor of the Post-Graduation Courses given by the Flexwhitedent Dental Medicine Clinic in Lisbon, Portugal.

In 2016, he was the lead surgeon in Shane MacGowan of The Pogues' full mouth rehabilitation.

Your Journey with Us

At your first appointment, you will meet our Implant treatment coordinator, ITCO, who is there to explain things to you and get to know your expectations. Your ITCO will then introduce you to Dr Wilson Grigolli who will assess your needs and prepare a detailed treatment plan.

Within 48 hours of your initial consultation we will send you out your individualised treatment plan to study at leisure in the comfort of your home. Your ITCO is at hand to answer any further questions you may have and will contact you over the coming days at a time best suited to you.

When you are ready to commence treatment, we will arrange a second appointment bringing you closer to your desired smile.

What our patients have said about us

“The initial consultation gave me a comprehensive overview of the treatment and I was offered several options. The staff were warm and welcoming. I felt they genuinely cared about my welfare. At each visit I was made to feel welcome and that they were pleased to see. I always feel like I’m in good hands here and that I will receive the best professional treatment available. I have already recommended Dental House to family & friends. Although I only have a temporary crown, the match with the others is excellent. Friends commented on how good the match is.”

“I chose DentalHouse because I had seen evidence of their work on friends/tv personalities. I was very impressed on my initial meeting by the care and professionalism demonstrated by all the staff. My treatment, from beginning to end has remained the same. A high level of skill, care, competency and honesty has been demonstrated. I felt completely calm and I had huge faith in the treatment at all stages. My end result has been exactly what I need and more. My faith in dentists has been restored and DentalHouse gave me a reason to smile and a million dollar grin. I would recommend them with a smile on my face and a song in my heart. Thank you!”

“I was referred to Wilson following an appointment with my dentist in Maynooth. They noticed an infection and felt that this needed a specialist and suggested Wilson. I was offered a free consultation in Maynooth where I met Wilson for the first time. He was very professional and explained everything to me about the issue, the approach and provided detail of the overall cost with a breakdown of the cost of each phase. I had to get an extraction, bone graft, implant and then a crown. Due to unforeseen circumstances I was unable to actually start the procedure for 10 months after the original consultation and they honoured the original quotation which was very good of them. Once I started I was very impressed with the facilities, their location, the modern equipment and most of all the professionalism and customer focus of the staff from the receptionist to the dental nurses (Karolina took great care of me) and then Wilson (for the extraction and implant) and more recently Claudio (for

the crown). The after care service was top class and the team ensured that everything was going to plan with regular check-ups.

Based on my experience to date I went and got my teeth cleaned in Dental House and it was the best clean I've ever had in a dentist. I also recommended the team to a work colleague and she has had the same top-class experience.

Going to the dentist is never a fun experience but I have to say they have done all they could to make it as painless and pleasant as possible.

I would recommend the team to anyone who required any dental work done."
